

31 January 2019

Dear Responsible Officer

Qualifications Wales is conducting a sector review of qualifications and the qualifications system in the Engineering, Advanced Manufacturing and Energy sector. This is the fourth in our series of sector reviews. As part of this review we will soon be conducting a technical review of qualifications in the sector that are offered by recognised awarding bodies in Wales. A team of Engineering, Advanced Manufacturing and Energy experts will be joined by assessment experts who will review specifications, assessment materials, quality assurance documentation and a sample of learners' assessed work.

The technical review will focus on qualifications that are awarded in the greatest numbers in secondary schools, further education colleges and work-based learning providers in Wales. We will be contacting awarding bodies who offer these qualifications between March and April 2019 to request the necessary evidence for the technical review.

If you have any questions or queries about this sector review, please contact us at engineeringreview@qualificationswales.org.

Yours sincerely
